Where you live should not determine *how long you live*. However, in many U.S. cities, including several neighborhoods in Allegheny County it does matter.

What will we do?

• Working with community members, Community Empowerment Association and Pitt Public Health will host a series of “Neighborhood Conversation” meetings to share information and data about health.

• We will learn what community members feel are the health-related challenges that members of their community are facing.

You can help make a difference by becoming a “Community Researcher” by sharing this project with your neighbors and solving problems together.

What is it?

• Community Empowerment Association and Pitt Public Health are working together to address why some people are dying early in the Homewood, McKeesport, and Clairton neighborhoods.

Why?

• Life expectancy in Homewood, McKeesport, and Clairton is 11-15 years shorter than that of some other neighborhoods in Allegheny County.

How?

• We want your voice to be heard so we can make a change in our community.

What is the expected outcome?

• Community members from your neighborhood, CEA, and Pitt Public Health will develop tools and resources to help create a culture of health and well-being.

For more information, contact Community Empowerment Association.
